The M6-Mini is a compact version of the M6 with a length of barely 88mm. It utilizes the same warm white LED of 3000K color temperature, nearly the same as an incandescent bulb with color rendering index of 85%. This LED reduces the blue light damage to human eyes and protect users' vision. A professionally designed output curve with a light emission angle of 70 degrees, coupled with high transmission (over 90%) optical glass lens, results in a perfectly even lit circle of light. The area within the light circle has no dark spot, no glare, and no distracting uneven lighting anywhere.

Included accessories for the M6-Mini includes a steel clip. The M6-Mini can be easily attached to hat visors, shirt pockets. With 1 AAA battery for power, the M6-Mini is the perfect close-up inspection light, reading light or everyday carry light.

Item Name	Part #
M6-Mini	71001

Features:

- Material: Anodized aerospace 6061 aluminum alloy
- Reflector: Optical glass lens
- Emitter: Warm white X-LED, color temperature 3000K, color rendering index of 85%
- Beam: Evenly distributed light, lighted area with 35cm diameter at 20 cm distance
- Output: 20 Lumens, 8 Candela @ 0.5 Meter
- Battery: (1 x AAA (LR03) Alkaline or AAA NiMH battery):
- Runtime: 6 Hours
- Reverse polarity protection
- Tail switch
- Water resistance up to IP65, suitable for use in rainy weather
- Individually serialized
- Dimension: (Body Dia.) 14 mm x (Length) 88 mm
- Weight: 17 gram (w/o battery)
- Included accessories: 1 x AAA Alkaline battery, Stainless steel clip
